

## **Anticipated Biology Electives, Summer 2008**

The lists below of anticipated biology elective courses are intended to help with your own long-term planning for electives. Please note that (a) additional courses will likely be added to the more future semesters since the listed offerings represent present staffing plans and (b) it may be necessary to make some additions or deletions from the lists in response to student interest, faculty changes, etc. Please inform Profs. Bergman or Davis of suggestions for additions/changes to the planned courses.

### **Spring 2008**

U313	Plant Biology
U315/6	Invertebrate Zoology
U317/8	Vertebrate Zoology
U321/2	Microbiology
U323/4	Biochemistry
U403	Animal Behavior
U405	Neurobiology
U407	Molecular Cell Biology
U543	Embryonic Stem Cells
U553	Biology of Muscle: Molecules to Movement
U575	Parasitology

### **Summer I 2008**

U311/2	Ecology
U319/0	Regulatory Cell Physiology
U553	Biology of Muscle: Molecules to Movement
U561/2	Herpetology
U701	Capstone

### **Summer II 2008**

U323/4	Biochemistry
U401	Comparative Vertebrate Anatomy
U407	Molecular Cell Biology
U701	Capstone
U964	Research
